GLOBAL OVERVIEW

Innovation Drives Safe and Sustainable Solutions

Chemical companies are investing in science-based, risk-informed solutions that improve safety, reduce environmental impacts, and advance sustainable development.

Five Principles

Integrate Sustainability

Balance environmental, social, and economic priorities.

Protect Health & Safety

Put people and communities first.

Innovate for Impact

Design solutions for a sustainable future.

Advance Circularity

Reduce waste and maximize resource value.

Build Trust

Lead with transparency and engagement.

Why It Matters for Governments

- Supports science- and risk-based decision-making.
- Promotes sustainable industrial growth and innovation.
- Accelerates adoption of safe and sustainable chemistry solutions.
- Helps implement the Global Framework on Chemicals.

ICCA Sustainability Ambition:

By 2030, we will guide product portfolios, including processes, toward sustainable solutions.

Advocacy Ask:

Support policies that encourage innovation, science-based decision-making, and the adoption of safe and sustainable chemistry solutions.
