GLOBAL OVERVIEW

International Council of Chemical Associations

RESPONSIBLE CARE™
Driving Safety & Sustainability

Strong Systems Turn Commitments Into Results

Effective chemicals management depends on strong legal frameworks, technical expertise, regulatory capacity, and practical implementation tools

Commitment

Capacity

Implementation

Results

Five Building Blocks

Responsible Care®

Supporting continuous improvement in health, safety, and environmental performance.

Product Stewardship

Ensuring chemicals are managed responsibly throughout the value chain.

Training & Expertise

Sharing technical knowledge and best practices.

30x30 Capacity Building

Supporting countries in building effective chemicals management systems through practical implementation projects.

Regulatory Capacity Building

Working with governments to strengthen implementation systems.

Government Outcomes

- ✓ Stronger institutions.
- ✓ Better regulatory performance.
- ✓ Increased technical capacity.
- ✓ Strengthened national chemicals management systems.
- ✓ More effective chemicals management.

ICCA 30x30 Capacity Building Ambition:

By 2030, we will support 30 countries in implementing effective chemicals management systems.

Advocacy Ask:

Prioritize practical capacity-building, knowledge sharing, and implementation support to help countries strengthen chemicals management systems.
